How to Set Up Open Claw via Ollama in a Secure Docker Container

Step 1: Install Docker Desktop

1. Download **Docker Desktop for Windows** from the official Docker website. **Crucial:** During installation, make sure the box that says **"Use WSL 2 instead of Hyper-V (recommended)"** is checked.

Note: The following instructions require Windows PowerShell 7 (x64) to be run in Administrator mode.

Step 2 (In Update):

Install git then clone it

git clone https://github.com/openclaw/openclaw.git

cd openclaw

create the .env file and save these items inside

Go to your .config file and see that your package.json looks like mine or do your own onboarding

docker compose run --rm openclaw-cli onboard

docker compose up -d openclaw-gateway
